DETAILED ACTION

Arguments

1. Applicant's arguments, filed 4/7/04, have been persuasive. New grounds for rejection have been provided. This action is a final action based on the amendments to the previous non-final action provided on 12/30/03.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by www.fox.com. The fox network shows a group of related domain named websites all having the core name "fox" involved either alone or with a product label attached such as foxmovies, foxtv, foxsports, and foxnews. Direct links between the varying sites are shown.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3627

Claims 18-25,29,30,34-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki et al. in view of www.fox.com.

Suzuki et al. shows all of the limitations of the claims except for specifying the domain labeling method.

Suzuki et al. shows, figure 2, a virtual mall with many stores, which are related as being members of the same mall. Products (some can be restaurant related) are sold and centrally processes.

www.fox.com teaches a method of placing a common word "fox" in all its domain names in order to take advantage of their name recognition.

Based on the teaching of www.fox.com, it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Suzuki et al. system to use the same domain naming method as fox in order to take advantage of their name recognition.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. www.nycvisit.com and www.nycrestaurant.com show sites of interest.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3627

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
